

TECHNICAL SHEET “IN-CONTROLADO”

ARRIVAL

At least 3 hours before the start of the performance. Please provide entrance until stage for a car with trailer.

BUILDING UP

1 hour. Provide some helping hands (at least three persons) for building up the Chinese Pole.

PREPARATION + WARMING UP

2 hours

BUILDING DOWN

1 hour

THE PLAY GROUND

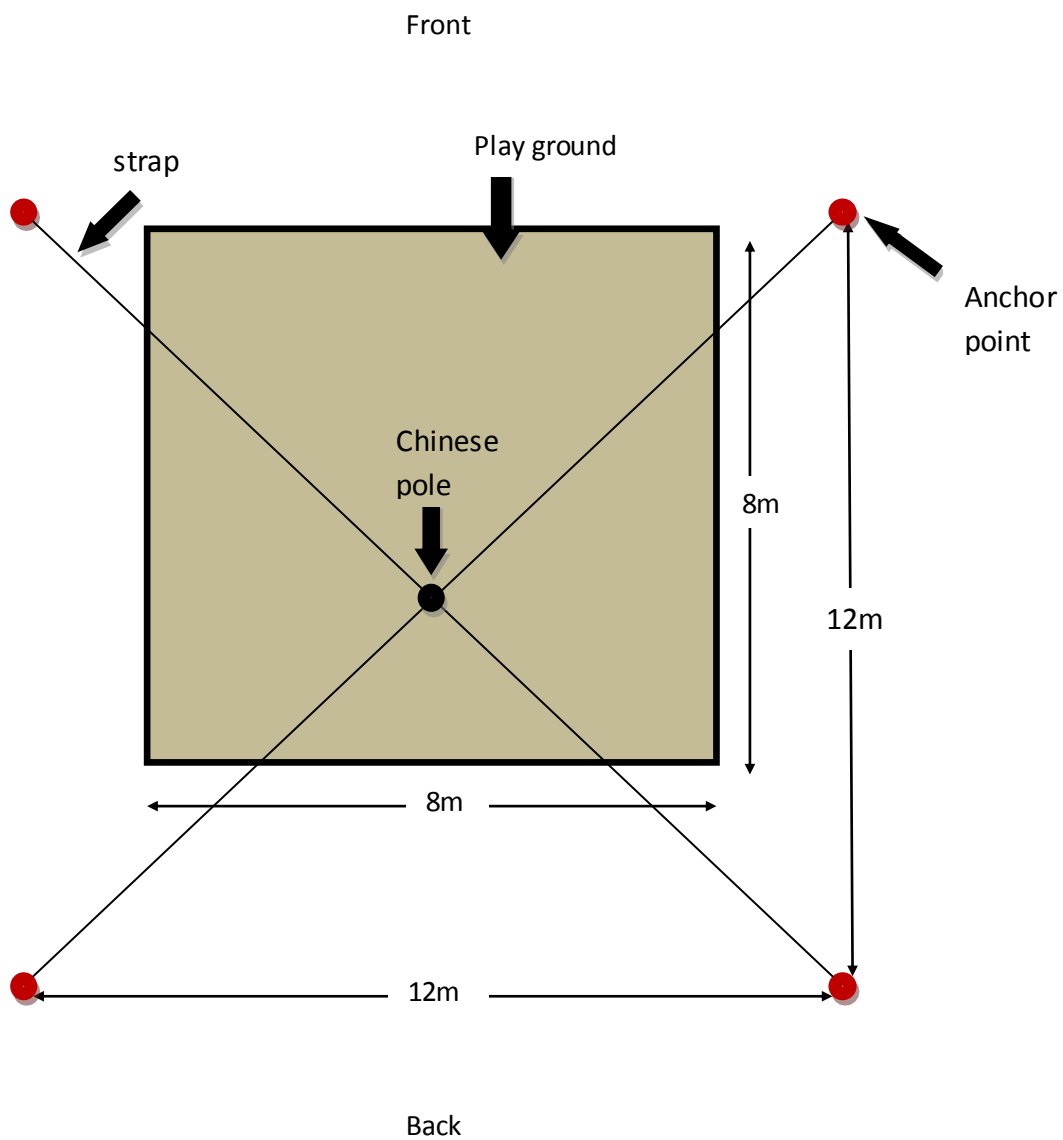

- The performance can only be played on an **entirely plane, hard, clean and stable surface of minimum 8x8 meters**.
- The height of the playing surface should be at least **6m50**.
- 4 anchor points for the Chinese pole: in a square of minimum 10m, with a capacity of +/- 400 kg each.
- The place where comes the Chinese pole should handle a load of 1000 kg.
- Electrical connection (220V) with at least 6 outlets.

SOUND

If possible, provide a full sound system with 2 active speakers + standarts, a mixing table with mini-jack connection for labtop or mp3.

PLAN

- The audience should sit/stand as much as possible in front of the stage and certainly not in the back.
- The Chinese pole comes not in the centre of the stage, but a bit in the back.

EXTRA

If raining the performance cannot be played.
